

Urbanscape[®] MobileGreenwall

Urbanscape® MobileGreenwall

The MobileGreenwall in all its elegance. See for yourself.

System Features

Air circulation fan

The green wall contains a specialized system which circulates air to effectively maintain the good condition of the greenery. The silent fan ensures the distribution of produced oxygen throughout your surroundings. By choosing for MobileGreenwall, you are choosing for an improved indoor climate!

LED grow light

A specially designed grow light is included to ensure that the plants remain in a good condition. This way, MobileGreenwall can be installed everywhere in your interior, while maintaining the quality of the plants. Even in the darkest of places, this green wall will thrive!

104 plants

In total, 104 plants fit in this green wall

Water reservoir

This can be installed in less than an hour and the automatic watering system only needs to be refilled every four weeks. The capillary method makes sure the plants get all the water they need.

Wi-Fi Controller

All technical aspects, such as the watering system and light activity, are accessible online via a mobile application.

Moveable

This free-standing and movable living room divider gives you freedom to design spaces according to your own taste. The MobileGreenwall can easily be moved to other locations because of its wheels and low weight. The possibilities for your interior are endless!

Microfilter

The microfilter ensures a clean water flow through the system

UV filter

Built-in UV filter for disinfecting the water

Technical Specifications

The MobileGreenwall is one of a kind due to its movability and effortless maintenance. Not only does the living wall brighten up your private or business surroundings, it also improves health status and air quality. This living indoor wall is a sound investment because of its positive influences: movability and customizability. This vertical garden provides a great opportunity to install over 100 plants in your environment!
